ER Staff IC vs. CIITS Setup

- Education Recovery (ER) Staff are added to CIITS by Schoolnet and do NOT need IC setup to receive access to CIITS.
- IC setup could interfere with CIITS access if not setup properly.
- If ER Staff need access to IC or if they are having issues with their CIITS access they will need to contact their current and/or previous District KSIS Point of Contacts (POC) found [here](#) (select KSIS Primary Point of Contact – District).
- ER staff can send their KSIS POC's the following document for step by step assistance.

CIITS Job Categories and Evaluation Override

- Data in IC will be used to align **certified staff who will be evaluated** to a job category. Job category aligns them to the correct evaluation framework in CIITS.
- Job categories will be determined using **Type / Alternate Type** value on a person's active assignment records in IC.
 - **Type / Alternate Type must be the same on all of a person's active assignment records within one school in IC.**
 - Type/Alternate Type **may** be different **between schools** in IC.
 - If Type/Alternate Type value is different **between schools**, the New field on the District Assignments tab "**Evaluation Override**" must be set to specify which value the person should be aligned with when determining job category.

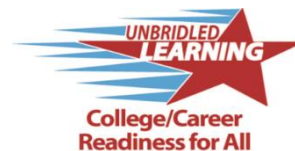

- » Only needs to be set for certified staff who have different Type/Alt Type values **between** schools.

Non-Traditional Instruction (NTI)

CIITS can be used to assist with documentation for Non-Traditional Instruction days. The CIITS Google Training site has the Quick Reference Card (QRC) that outlines ways in which learning outcomes and sample work can be collected and submitted for review. To access the QRC [click here](#) and look in the middle column titled as above.

QUESTIONS ?

17.0 Results

- ❖ From District (8 teachers, 2 principals, 2 district administrator): 12 completed scripts
- ❖ From KDE: 11 completed scripts
- ❖ The following are the notables:
 - Managing documents (like adding artifacts) on an iPad does not work because it requires Flash.
 - Note: IE9 is no longer supported.
 - When downloading a Student Test Booklet on a Mac to a Word document, images are missing. The images are available on the PDF version of the booklet. This does not happen on a PC.

17.0 Timeframe

- ❖ 10/26 - Training environment updated to 17.0 (during the day)
 - ❖ 10/30 - Production updated to 17.0 (upgrade during the night maintenance window)
 - ❖ 11/2 - DCT updated to 17.0 (during the day)
 - ❖ 11/3 - Back copy Production data to DCT2
- **Additionally, we have a tentative date of 11/24 when 17.1 will be promoted to the DCT2 site.

Schoolnet 17.0 IMS-Item/Assessment Creation Redesign User Experience

- Inline editing and validations
- Considerable page layout changes to better organize information
- A single-page, full-screen test edit mode with seamless navigation across test items

The screenshot displays the 'Demo Test: Editing Items' interface. On the left, a sidebar lists seven items: 1 Multiple Choice (with a red error icon), 2 Task (with a green checkmark), 3 Activities (with a green checkmark), 4 Matching (with a green checkmark), 5 Multiple Choice (highlighted in blue), 6 Checklist (with a red error icon), and 7 Multiple Choice (with a red error icon). The main area shows 'Item 5' as a 'Multiple Choice' question. The 'Question Content' field contains the text 'What is 15.34-1.11?'. Below this, the 'Correct' and 'Answers' section shows a correct answer 'A' with the value '14.23'. A rich text editor is visible for editing the answer. On the right, a 'Create New Item' dropdown menu is open, showing options for 'For Print and Online' and 'Online Only'. The 'Open Response' option is highlighted. Below this, a 'Create Item' modal is shown with three steps: 1 Select Subject, 2 Select Grade Range, and 3 Select Standard Alignment. The 'Multiple Choice' question type is selected, and the 'Question Content' field is empty.

Schoolnet 17.0: IMS-Select Standards feature

- Use the text box to search for standards by text content or ID and see matches appear as you type.
- Use the standards document filter to search across multiple standards documents in a subject.
- A condensed view shows the more seasoned user a list of more standards and less text without scrolling
- For test items, defaults to browsing and searching standards in your test's Preferred Standards Document within the grade range defined for the test
- For items outside of tests, defaults to browsing standards within the item's grade range that match the item's subject

Schoolnet 17.0: IMS- Checklist item type

- Ability to select multiple answers
- Supports two scoring models: default scoring or all or none
- Updated reporting
- QTI support
- Co-authoring support
- Updated answer sheets
